

The first two articles are summaries of the study's investigations into changes in work and security of employment on health.

Does change at work affect your health?

One of the main reasons for the Civil Service work environment study was to investigate whether changes in the workplace could affect the health of employees. The results of the study were published in 2002 and were mainly based on data from 1995-1996. The study was conducted by the Health Research Institute at the University of Warwick.
